C. Academic Profile

Teaching Philosophy

At Osler ENT Associates, our goal as clinical teachers is to provide undergraduate and post-graduate trainees with a comprehensive, community-based Otolaryngology – Head and Neck Surgery experience that is appropriate to their level of training. We have a high volume community practice that includes all major facets of the specialty including head and neck and endocrine surgery, facial plastic and reconstructive surgery, rhinology, otology, pediatric and general otolaryngology. Trainees have the opportunity to develop their clinical skill, procedural abilities and surgical techniques. In addition to hands-on learning, we provide teaching sessions and Royal College style mock-oral examinations for senior residents. Senior trainees receive training in practice management, charting and documentation, and medical-legal risk management.

Our overall philosophy is to deliver an experience that fosters clinical and surgical competence, professionalism, and collegiality and prepares trainees to enter independent clinical practice.

Teaching Profile

Our practice regularly accommodates post-graduate trainees in Otolaryngology – Head and Neck Surgery from the University of Toronto who choose to do their community electives with us. We also accommodate post-graduate trainees from the Department of Family Medicine and the Division of Otolaryngology - Head and Neck Surgery at McMaster University.

From 2007 to 2011 while participating in the Ministry of Health and Long-Term Care's Visiting

Specialist Program to underserved areas, I held an academic appointment with the Northern Ontario School of Medicine, Lakehead and Laurentian Universities with the rank of Lecturer in the Division of Clinical Sciences. During that time, I supervised and instructed undergraduate medical students and post-graduate general surgical trainees in clinic and operating room settings. I also was active in developing and presenting continuing medical education lectures relating to Otolaryngology – Head and Neck Surgery for general practitioners in the Algoma District Medical Group, post-graduate trainees, and the Canadian Hearing Society.

List of Otolaryngology – Head and Neck Surgery and Family Medicine post-graduate trainees supervised:
